

CORONA Economic Index™

The CORONA Economic Index™ measures the performance of our local economy based on 5 main components, all of which are equally weighted and seasonally adjusted. We use 2008 as our base year, starting with a value of 100.

Our Q4 15 Index is down 6.7% with 3 of 5 components noticing decreases from the previous quarter. Although down this quarter, our Index is currently up 44.6% from the recession low in Q4 12. According to our latest CORONA Business Confidence Survey™ from March 2016, 61% of local business leaders expect a better local economy in the next 12 months, while just 6% expect worse conditions.

Click on the “read more” links below, or go to www.mychamber.org to learn more about each Index component and to see the results of the newest CORONA Business Confidence Survey™!

OUR NUMBER

2008 = 100
